### PBN believes ANGA Cable just gets better and better each year

**Melbourne, Australia, 26 May 2010** - PBN was a sponsor exhibitor at ANGA Cable, a leading international trade fair for cable, broadband and satellite. The event was held in Cologne, Germany for the period of 4-6 May 2010.

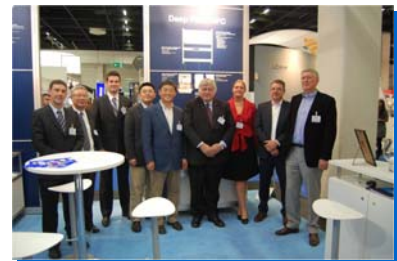

PBN believes ANGA Cable just gets better and better each year. The trade fair was a great success for our company and the team were thrilled by the number of visitors to our booth.

The organisers of ANGA Cable recently announced the trade fair was very successful with more than 15,000 visitors attending for the first time ever. This represented an increase of 10 percent compared to the previous year.

During the trade fair, the visitors to our booth were able to register for a chance to win a brand new GPS, by simply leaving a business card with one of our Representatives. PBN received an overwhelming number of entrants over the 3-day period. PBN is happy to announce that a lucky winner of the competition has been drawn and notified accordingly. To the entrants that did not win the competition, thank you for participating and we wish you better luck next time.

Coinciding with the trade fair was the opening of PBN's new office, which is located in Almere, The Netherlands. The new office, headed by Mr. Gerhard Nederlof, Senior Vice President of Global Sales and Marketing, is totally focused on enhancing the level of service and support provided to customers and channel partners. It will undoubtedly prove to be beneficial for our European customer base.

## About PBN

Pacific Broadband Networks; also well-known in the communications industry as PBN, is an experienced Australian company that specialises in developing products and solutions that enable Network Operators to run video, voice and data services over a high-speed broadband pipeline. PBN is one of only a few companies globally who uniquely offer leading-edge products and solutions that represent significant advantages for Operators of Broadband Networks. Our enviable reputation is supported by over 15 years of industry experience.

PBN has partnered with many customers around the world to help them leverage their existing Hybrid fibre-coaxial (HFC) infrastructure to protect their investment, while they gradually migrate to Radio Frequency over Glass (RFoG) and Fibre to the Home (FTTH). PBN provides comprehensive broadband distribution and access solutions to tens of millions of subscribers served by hundreds of headend facilities globally.

PBN's offices are in America, Australia, China, Europe and Hong Kong. PBN is also well represented by channel partners globally. For more information about the company, the people, the products and the solutions, visit [www.pbnglobal.com](http://www.pbnglobal.com).
